

Postdoctoral Research Fellow Position in Neurovascular Coupling

Department of Physiology
Medical College of Georgia
Augusta University

The **Department Physiology** (<http://www.augusta.edu/mcg/phy/>) at **The Medical College of Georgia at Augusta University** invites applications for a highly motivated full-time postdoctoral research scholar position. The laboratory focuses on understanding signaling mechanisms underlying neurovascular uncoupling and the impact of cardiovascular and neurodegenerative diseases (Alzheimer's disease) in these processes. Technical expertise in at least one of the listed areas is preferred but not required. Molecular biology, microcirculation (e.g., arteriole cannulation), patch-clamp electrophysiology, *in vivo* two-photon imaging, *in situ* live confocal microscopy, immunohistochemistry, RNA-seq.

Candidates must have a Ph.D. or equivalent doctorate degree. To apply for this position, please apply through <http://www.augusta.edu/hr/jobs/university/index.php> **Job Id# 234701**. You can also directly send your CV and contact information to Dr. Jessica Filosa at jfilosa@augusta.edu. Review of applications will begin immediately and continue until the position is filled.

Augusta University is an equal employment, equal access, and equal educational opportunity and affirmative action institution. Also, Augusta University is a federal contractor and desires priority referrals of protected veterans. It is the policy of the University to recruit, hire, train, promote and educate persons without regard to age, disability, gender, national origin, race, religion, sexual orientation or veteran status.
