WELCOME LETTER

Dear Colleagues,

On behalf of the Local Organizing Committee, we welcome you to the XXVIth International Symposium on Cerebral Blood Flow, Metabolism and Function and the XIth International Conference on Quantification of Brain Function with PET that is being held in Shanghai, China from May 20-23, 2013.

Following the tradition of previous meetings, "Brain 2013" will cover numerous aspects within the area of neuroscience research, particularly those related to brain function and metabolism, cerebral blood flow, the function of the neurovascular unit and the blood-brain barrier, brain imaging, and cerebrovascular pathology. Our goal is to present the state-of-the art and novel discoveries that will increase our understanding of brain function under physiological and pathological conditions, and the most promising investigations in brain protection and neuroregeneration. Leading scientist in these fields, members of the International Society for Cerebral Blood Flow and Metabolism (ISCBFM) and other exceptional scientists will participate as in previous biannual meetings of the ISCBFM. The program committee has actively focused on creating an engaging scientific program that will be of interest to you.

Shanghai, the largest city in China, is home to over 20 million inhabitants. The city is a fascinating metropolis for tourists and is renowned for its historical landmarks such as the Bund and City God Temple and its modern Pudong skyline including the Oriental Pearl Tower.

Shanghai, whose meaning is "Upon-the-Sea", lives up to its legacy. With one of the busiest ports in the world, Shanghai is globally influenced and influential, as a center of commerce between the east and the west.

We welcome you here in Shanghai for Brain'13 & BrainPET'13 and wish you a wonderful stay.

ABOUT ISCBFM

The International Society for Cerebral Blood Flow and Metabolism (ISCBFM) is organized and operated exclusively for the purpose of promoting the advancement of education in science of cerebral blood flow and metabolism and related topics throughout the world.

The Society promotes research in cerebral blood flow, cerebral metabolism and cerebral functions in physiological and pathophysiological states. Interests of members in the Society range from the molecular and genomic mechanism of Ischemia through to the clinical investigators of cerebral blood flow and metabolism.

The Society hosts biennial meetings in various locations throughout Asia, Europe and North America. The International Symposium on Cerebral Blood Flow, Metabolism and Function (Brain) and the International Conference on Quantification of Brain Function with PET (BrainPET) are held jointly and bring together a diverse group of investigators for the exchange of scientific information on regulation of cerebral blood flow and metabolism. The International Symposium of Cerebral Blood Flow and Metabolism was first held in 1964, with subsequent meetings held approximately every two years. It wasn't until 1981, however, that the Society was formally established.

At the time of the establishment of the Society, the Journal of Cerebral Blood Flow and Metabolism, started publication and continues to be a highly respected and cited monthly publication. It is relevant to neurologists, neurochemists, psychologists, pharmacologists, physiologists, biochemists, anesthesiologists, neuroradiologists, neuropathologists and neuroscientists in general.

In addition to the biennial meetings and the Journal, the ISCBFM organizes "schools" to bring young and senior investigators together, and helps organize and run the Gordon Research Conference in Brain Energy Metabolism and Blood Flow.

ABOUT SHANGHAI

Shanghai, the largest city in China, is home to over 20 million inhabitants. It is a multi-cultural metropolis with both modern and traditional Chinese features. The city is a fascinating hub for tourists and is renowned for its historical landmarks such as the Bund and City God Temple as well as its modern Pudong skyline including the Oriental Pearl Tower.

Shanghai, whose meaning is “Upon-the-Sea”, lives up to its legacy. With one of the busiest ports in the world, Shanghai is globally influenced and influential, as a centre of commerce between the east and the west. Because of Shanghai's status as the cultural and economic centre of East Asia, it is popularly seen as the birthplace of everything considered modern in China. Asia looks to Shanghai as the trendsetter in all things cultural, including cuisine, art, cinema and fashion.

This city bristles with buildings, but it doesn't boast must-see sights like New York or Rome. The joys of Shanghai, instead, are on the street level, where everyday life unfolds with bewildering variety.

5 THINGS TO DO IN SHANGHAI

Shanghai Maglev Train

The magnetic-levitation train ride from the international airport to the city is the perfect metaphor for Shanghai. The train reaches speeds of 430 km/hr (267 miles/hr), and the trip takes less than eight minutes. You'll be feeling a bit whiplashed, but that sense of disorientation hints at the fast-paced city that lies ahead.

Shanghai Museum

A museum, where its shape mimics that of an ancient bronze cauldron, located on People's Square this museum is packed with fascinating riches. From calligraphy to jades and ceramics to bronzes there is more than enough striking treasures to set your eyes upon.

Dongtai Road Antique Market

Dongtai Road is the only remaining flea market in the Shanghai area that is still devoted to selling antiques. A renowned outdoor market full of character with 125 stalls selling everything from curios and trinkets to furniture items and various other props that are peddled as genuine. Also worth a visit to watch the locals loudly playing cards, or slapping Mahjong tiles on tabletops.

Yuyuan Garden

This Garden is believed to have been built in the Ming Dynasty, more than 400 years ago. The garden covers a significant space with cultural relics including century-old furniture, calligraphic and painting works of famous artists, clay sculptures and brick carvings. One of the famous attractions is the exquisite Jade Rock.

Oriental Pearl TV Tower

The 468 meter high tower has been the outstanding landmark of Shanghai since its completion in 1995. The sightseeing platform in the TV tower provides visitors with a panoramic view of the Bund and Pudong New area.

INFORMATION FOR PRESENTERS

All speakers presenting in sessions are kindly requested to submit their presentations to the Speakers' Ready Room at least 1 hour before the start of their session.

The Speakers' Ready Room is clearly marked at the venue and will be available for speakers every day throughout the Symposium.

If using a PowerPoint (or any other computer) presentation, please note you need to bring it on a CD, a DVD or on a "disk on key" Memory stick (using the USB port in the computer) and load it on one of the conference' computers in the Speakers' Ready Room, at least 1 hour before the start of the session.

Please note that the conference computers in the session halls are being supplied with Office 2010.

If combining video films with PowerPoint, please make sure to check it in the session hall where your lecture is taking place during a coffee or lunch break prior to your session, at least 30 minutes before the start of the session - **even after checking it in the Speakers' Ready Room**.

Alternatively you may supply your own laptop computer. In such a case please confirm that it has a VGA socket for external signal and come to check it first in the Speakers' Ready Room as soon as you arrive and later on in the session hall where your lecture is taking place during the coffee or lunch break prior to your session, at least 30 minutes before the start of the session.

Important note for Macintosh users

In order to use MAC presentations on a PC compatible computer please note that you need to prepare it according to the instructions below, before bringing it to the Speakers' Ready Room:

1. Use a common font, such as Arial, Times New Roman, Verdana etc. (special fonts might be changed to a default font on a PowerPoint based PC).
2. Insert pictures as JPG files (and not TIF, PNG or PICT - these images will not be visible on a PowerPoint based PC).
3. Use a common movie format, such as AVI and WMV (MOV files from QuickTime will not be visible on a PowerPoint based PC).

Alternatively you may use your own Macintosh laptop computer. In such a case please confirm you provide it with a **VGA adaptor** for external signal and come to check it first in the Speakers' Ready Room as soon as you arrive and later on in the session hall where your lecture is taking place during the coffee or lunch break prior to your session, at least 30 minutes before the start of the session.

Please note that VHS Video projection, 35 mm' slide projection and Overhead projection (projection of transparencies) will not be available.

INFORMATION FOR POSTER PRESENTERS

Poster Presentations are an integral part of the Scientific Program and an invaluable opportunity for the exchange of ideas and updates on new research.

Brain Poster Presentations

Brain 2013 Poster Presentations will be on display in three 1-day sessions by topic.

Please refer to the Scientific Program for the exact date and poster board number.

Participants are requested to be present at their designated poster board(s) for informal discussion during morning and afternoon coffee /lunch breaks.

The Organising Committee will not be responsible for posters that are not removed by the end of the designated poster session.

Poster Session I - Tuesday, May 21, 2013

Posters should be mounted from 07:30 until 19:00

Poster Topics	Poster Board No.
Animal Models	1-37
Biomarkers	38-50
Blood-Brain Barrier	51-66
Brain Edema	67-76
Cardiac Arrest/Global Cerebral Ischemia	77-89
Cell Death/Survival	90-107
Cellular Mechanisms	108-117
Cerebral Hemorrhage/Subarachnoid Hemorrhage (SAH)/Vasospasm	118-151
Cerebral Metabolic Regulation	152-161
Cerebrovascular Regulation	162-193
Clinical Studies	194-221
CNS Immune Interactions	222-223
Hypoxia / Ischemia in the Developing Brain	224-240

Poster Session II - Wednesday, May 22, 2013

Posters should be mounted from 07:30 until 19:00

Poster Topics	Poster Board No.
CNS Repair and Regeneration	1-9
CNS Trauma	10-28
Co-morbidities and Aging	29-35
Endogenous Neuroprotection	36-41
Genetic and Epigenetic Factors	42-44
Glial Mechanisms	45-52
Imaging: CT/SPECT/PET	53-71
Imaging: MRI	72-121
Imaging: Optical	122-135
Imaging: Other	136-142
Ischemic stroke	143-251

Poster Session III - Thursday, May 23, 2013

Posters should be mounted from 07:30 until 17:30

Poster Topics	Poster Board No.
Mitochondria and other Organelles	1-6
Molecular Mechanisms	7-19
Neurogenesis, Angiogenesis, and Gliogenesis	20-29
Neuroinflammation	30-51
Neurological Diseases	52-72
Neuroprotection	73-134
Neurovascular Unit	135-144
Oxidative Mechanisms	145-149
Pharmacology and Therapeutics	150-166
Preconditioning and Post-Conditioning	167-182
Reperfusion	183
Stem Cells and Cell Therapy	184-207
Vascular Cognitive Impairment / Dementia	208-220
White Matter Injuries	221-225

BrainPET Poster Presentations

Brain PET Posters may be mounted on Monday, May 20 after 19:00 and will remain on display for 2 days: **Tuesday, May 21 and Wednesday, May 22**.

Please refer to the Scientific Program for the poster board number.

BrainPET posters should be removed by the end of sessions on Wednesday, May 22 (18:30).

The Organising Committee will not be responsible for posters that are not removed by the end of the poster session.

Beckman Coulter develops manufactures and markets products that simplify, automate and innovate complex biomedical testing. Our diagnostic systems are found in hospitals and other critical care settings around the world and produce information used by physicians to diagnose disease, make treatment decisions and monitor patients. Scientists use our life science research instruments to study complex biological problems including causes of disease and potential new therapies or drugs. Hospital laboratories are our core clinical diagnostic customers. Our life science customers include pharmaceutical and biotechnology companies, universities, medical schools and research institutions. More than 275,000 Beckman Coulter systems operate in both diagnostics and life sciences laboratories on six continents. For more than 75 years, our products have been making a difference in peoples' lives by improving the productivity of medical professionals and scientists, supplying critical information for improving patient health and reducing the cost of care.

Thermo Fisher Scientific Inc. (NYSE: TMO) is the world leader in serving science. Our mission is to enable our customers to make the world healthier, cleaner and safer. With revenues of \$13 billion, we have approximately 39,000 employees and serve customers within pharmaceutical and biotech companies, hospitals and clinical diagnostic labs, universities, research institutions and government agencies, as well as in environmental and process control industries. We create value for our key stakeholders through three premier brands, Thermo Scientific, Fisher Scientific and Unity? Lab Services, which offer a unique combination of innovative technologies, convenient purchasing options and a single solution for laboratory operations management. Our products and services help our customers solve complex analytical challenges, improve patient diagnostics and increase laboratory productivity.

Brain Course:

TOOLS FOR STUDYING THE BLOOD BRAIN BARRIER AND NEUROVASCULAR UNIT

This session is supported by the International Brain-Barriers Society (IBBS).

Chairperson: **B. Banks, USA**

09:00 INTRODUCTION
B. Banks, USA

09:10 TRANSLATIONAL SCIENCE AT THE NEUROVASCULAR INTERFACE: CHALLENGES OF IN VITRO TO IN VIVO BIOLOGY
A. Prat, Canada

09:50 UTILITY OF IN SITU BRAIN PERfusion TO STUDY MECHANISMS OF TRANSPORTER ACTIVITY AND REGULATION AT THE BLOOD BRAIN BARRIER.
P.T. Ronaldson, USA

10:30 Coffee Break

11:00 QUANTIFICATION OF BLOOD BRAIN BARRIER PERMEABILITY IN HUMANS WITH CONTRAST-ENHANCED MRI: A NOVEL TOOL TO STUDY VASCULAR DISEASES
G.A. Rosenberg, USA

11:45 BRAIN VASCULAR GENOMICS: METHODS FOR QUANTITATION, ANALYSIS AND INTERPRETATION
L.R. Drewes, USA

12:30 Lunch Break

Monday, May 20, 2013

09:00-12:30
