ISCBFM WELCOME LETTER

On behalf of the President, Local Organizing Committee and Program Committee of the International Society for Cerebral Blood Flow and Metabolism (ISCBFM), we wish you a warm welcome to BRAIN & BRAIN PET 2019, the 29th International Symposium on Cerebral Blood Flow, Metabolism and Function in conjunction with the 14th International Conference on Quantification of Brain Function with PET to be held in Yokohama, Japan from July 4-7, 2019. Following the tradition of previous biannual meetings, BRAIN & BRAIN PET 2019 will cover numerous aspects within the area of neuroscience research, particularly those related to brain function and metabolism, cerebral blood flow, the function of the neurovascular unit and the blood-brain barrier, brain imaging, brain repair, and cerebrovascular pathology. Our goal is to present the state-of-the art and novel discoveries of these fields in the conference.

Yokohama, the second largest city in Japan, is located next to Tokyo along the coastline of the Pacific Ocean, and is the first harbor city introduced to the world as the entrance to Japan. Since the time its port was opened, Yokohama has been vigorously acquiring new cultures and information from countries all over the world, and deserves its title as the birthplace of Japan's modern culture. Thanks to the myriad views of the port, a unique and fascinating townscape has developed, which augments its various artistic and cultural attractions. Yokohama offers plenty of opportunities to experience Japanese culture including delicious and diverse dining experiences of the world heritage "Washoku," traditional dietary culture of Japan. In addition, it has wonderful accessibility to various famous sightseeing spots such as Tokyo, Mt Fuji, the historic town of Kamakura and hot spring resort areas in Hakone. Yokohama will provide the delegates and their families with a wealth of opportunities for discoveries and adventure, at the conference and beyond.

A stimulating program combined with a wonderful location, will hopefully make this conference an exciting event.

We very much look forward to your participation in BRAIN & BRAIN PET 2019 and to welcoming you to Yokohama.

Yours Sincerely,

Eng H. Lo

ABOUT ISCBFM

The International Society of Cerebral Blood Flow and Metabolism (ISCBFM) is organized and operates exclusively to promote the advancement of education and research in the science of cerebral blood flow, cerebral metabolism and cerebral function throughout the world. Member interests range from the molecular and genomic mechanism of ischemia through clinical investigations of cerebral blood flow and metabolism.

The ISCBFM hosts biennial meetings in various locations throughout Asia, Europe and North America. The International Symposium on Cerebral Blood Flow, Metabolism and Function (BRAIN) and the International Conference on Quantification of Brain Function with PET (BRAIN PET) are held jointly and bring together a diverse group of investigators for the exchange of scientific information on regulation of cerebral blood flow and metabolism. The International Symposium of Cerebral Blood Flow and Metabolism was first held in 1964, with subsequent meetings held approximately every two years. It wasn't until 1981, however, that the Society was formally established. At the time of the establishment of the Society, the *Journal of Cerebral Blood Flow and Metabolism* started publication and continues to be a highly respected and cited monthly publication. It is relevant to neurologists, neurochemists, psychologists, pharmacologists, physiologists, biochemists, anesthesiologists, neuroradiologists, neuropathologists, and neuroscientists.

A flagship commitment of the ISCBFM is to support young and early career neuroscientists (Early Career Investigators-ECIs). At each BRAIN & BRAIN PET meeting, ISCBFM has consistently supported Student and Scholar ECIs and organized programs to enhance networking and mentorship. At the BRAIN & BRAIN PET 2019 meeting, ISCBFM awarded travel bursaries to 103 Student and Scholar ECIs from all corners of the globe. The Society is also sponsoring an Early Career Networking Social and will be rolling out a mentorship program.

Be sure to stop by the ISCBFM booth (#8) to learn more about the Society and the benefits of membership!

ABOUT YOKOHAMA

Yokohama, the second largest city in Japan, is located next to Tokyo along the coastline of the Pacific Ocean. The city has long prospered as an international port city trading with foreign countries that opened to the world in 1859, as it had favorable facilities to host ships from abroad. Since that time, Yokohama has been vigorously acquiring new cultures and information from other countries, and it developed a reputation as the source for new information from abroad that was disseminated around Japan, hence its nickname as the birthplace of Japan's modern culture.

2019 will mark the 160th Anniversary of the opening of the port of Yokohama, and today the city, continues to boast an international population and cosmopolitan atmosphere.

Along with Yokohama's historical port, many other attractive, traditional sightseeing spots will welcome you. The largest Chinatown in Japan, the Yokohama Red Brick Warehouses and Yamashita Park are near the conference venue, PACIFICO Yokohama. Close by is the expansive Sankeien Garden of traditional Japanese garden design.

For those who like shopping, the Yokohama Landmark Tower, a 296 meter skyscraper with a shopping complex is located close to the station, along with Queens Mall complex. At the Yokohama Red Brick Warehouse, you can enjoy shopping and dining of every kind, and various amusement facilities which offer entertainment both day and night.

Yokohama offers a wide range of diverse cuisines, and dining is an unforgettable experience. There is a wide selection of healthy "WASHOKU" Japanese cuisine that you will enjoy trying. In addition, you will discover world-class international cuisine, including Chinese, Italian, French and Indian restaurants. Thanks to its location, Yokohama is also known for delicious fresh seafood.

Wherever you go in Yokohama, you can experience the distinctive atmosphere and history of this harbor town. A number of antique and historic pieces of architecture can be found here, which display many western style symbols of Yokohama culture.

画力、速力、究めて。魅せるMRI Vantage Galan 3T

目利きや見巧者の鋭い目が道を究める日本文化の洗練を育んだように。「いのち」を守る現場に立つドクターと医療スタッフの妥協なきニーズが、「究」「匠」「和」を開発テーマとしたMRI、Vantage Galan 3Tを誕生させました。最大の特長は「**究の質**」を追求した、鮮鋭の高画質。独自技術Saturn Technologyに加え、RF送信効率を向上させたPURERF Tx、電子ノイズを低減させたPURERF Rx、特許出願中の2つの技術により、SNRを20%アップしました。さらに、スループットも大きく進化。撮像から解析まで、装置がアシストする豊富なアプリケーションとともに、よりスピーディで負担のない、検査スタイルが実現できます。3T MRI導入の鍵となる省エネ・省スペースを叶えた**「匠の技」**。広い開口部や静音技術、癒しの映像に包まれる**「和の空間」**。これまでにない、魅せるMRIの世界が現れます。
